FULL STACK DEVELOPER

A self-motivated and detail-oriented Full Stack Developer with hands-on experience in frontend and backend development. Experienced in Java, Advanced Java, HTML, CSS, JSP, JDBC, MySQL, Hibernate, Spring, and Bootstrap. Skilled in developing dynamic web applications, implementing database connectivity, authentication, role-based access, and CRUD operations. Able to work across the complete application development cycle, from designing user interfaces to developing backend logic and integrating databases. Seeking an opportunity in a dynamic IT organization where I can apply my technical knowledge, contribute to real-world projects, and continue growing as a software professional.

TECHNICAL SKILLS

Programming:	Java, Advanced Java, Java Programming
Web Technologies:	HTML, CSS, JSP, Servlets, JDBC, JavaScript
Frameworks:	Hibernate, Spring, Bootstrap
Database:	MySQL
Tools:	VS Code, Eclipse, IntelliJ IDEA, Maven

EDUCATION

Maharaja Agrasen Himalayan Garhwal University <i>MASTER OF COMPUTER APPLICATIONS (MCA)</i>	Uttarakhand 2024 – 2026
Swami Vivekanand Subharti University <i>Bachelor of Computer Applications</i>	Meerut, UP 2020 – 2023
H L V I C Haluwa, Basti Uttar Pradesh <i>12th</i>	U.P. Board 2018 – 2020
JANTA H S School Gonha, Basti UP <i>10th</i>	U.P. Board 2016 – 2018

PROJECTS

Ebook Store Management System

Technologies: Java, JSP, JDBC, Servlets, MySQL, HTML, CSS, Bootstrap, JSTL

- Description:** Developed a dynamic web-based application for managing an online book store, enabling users to browse, search, purchase, and manage eBooks. The system includes user registration, authentication, book categorization, order management, and administrative functionality.
- Key Features:** Implemented role-based authentication for User and Admin, Add to Cart and Checkout functionality, book search and filtering, and complete management of books, users, and orders through the admin panel.
- Responsibilities:** Designed responsive frontend interfaces using HTML, CSS, Bootstrap, and JavaScript. Developed backend functionality using Java Servlets and JSP and implemented JDBC connectivity with MySQL for database operations.

Hospital Management System

Technologies: Java, Maven, Servlets, JSP, JDBC, JSTL, CSS, Bootstrap, MySQL

- Description:** Developed a web-based hospital management application to manage patient registration, doctor information, appointments, and role-based access for Admin, Doctor, and Patient.
- Key Features:** Implemented role-based login/logout, appointment booking and management, doctor management, password change functionality, responsive user interfaces, and real-time MySQL database operations.
- Responsibilities:** Developed interfaces using JSP, HTML, CSS, and Bootstrap. Implemented backend logic using Java Servlets and JDBC. Designed the MySQL database and implemented secure session handling. Used JSTL to improve JSP maintainability and Maven for dependency management.

CERTIFICATIONS

Full Stack Web Development Certification – TAP Academy

Completed training focused on frontend and backend web development, Java, database connectivity, and full stack application development.
